RE	Religious Exemption (Nurse Only)	District	Manual		
<b>&amp;</b>	Scheduling Alert	District	Student Field U_DASA.ScheduleRequest is one of these values: 1		

## Invalid Field - Alert is tied to an invalid student field.

- The field existed in the past but has been deleted. This alert should be deleted.
- The alert is tied to a legacy custom field. The field should be migrated, and the alert should be updated to reference the resulting extended field.

 If the field has already been migrated, the alert must be updated to reference the resulting extended field.

Note: MBA Alert Creator types can only be edited at the level (school or District Office) where they were created. School-level alert icons only display at the school where they were created, and they do not travel with a student upon transfer to another school. District-level alert icons display at all schools and do follow a student after a transfer within the district.

The creation of new alert types at the school level is disabled.
